

BEFORE AND AFTER TREATMENT

CASE STUDY ONE

BEFORE
TREATMENT

AFTER 4 WEEKS
(4 weeks after 1st
treatment)

AFTER 6 WEEKS
(2 weeks after 2nd
treatment)

AFTER 6 MONTHS
(18 weeks after 3rd
treatment)

CASE STUDY TWO

BEFORE
TREATMENT

AFTER 3 WEEKS
(3 weeks after 1st
treatment)

AFTER 9 WEEKS
(6 weeks after 2nd
treatment, no further
treatment required)

AFTER 12 WEEKS
(No further treatment
after 2nd treatment)

CASE STUDY THREE

BEFORE
TREATMENT

AFTER 4 WEEKS
(4 weeks after 1st
treatment)

AFTER 8 WEEKS
(4 weeks after 2nd
treatment)

AFTER 12 WEEKS
(4 weeks after 3rd
treatment)

ASK YOUR PODIATRIST FOR MORE INFORMATION

MICROWAVE THERAPY FOR WARTS AND VERRUCAE

With treatment times in seconds,
Swift provides a precise and easy
way of treating skin lesions.

INFORMATION FOR PATIENTS

WHAT IS SWIFT®?

Swift is a new technology, developed in the UK, which has been licenced for the general treatment of skin lesions in Podiatry and Dermatology. Swift uses microwave energy which is delivered through a special probe applied to the skin to treat the affected tissue.

DOES IT HURT?

Like many treatments for skin lesions, some minor discomfort may be experienced. It is not uncommon for patients to feel a sharp sensation, similar to an injection. Unlike most treatments for verruca, pain felt during the treatment quickly subsides, and only in rare cases is there any prolonged pain.

WHAT CAN I DO AFTER TREATMENT?

In some cases the treated area may feel sore but will not prevent you undertaking normal daily activities.

HOW MANY TREATMENTS WILL I NEED?

This is dependent on how you respond to treatment. In some cases, you may need more than one treatment (these can be from 14 days to over a month apart depending on the response).

Your Podiatrist or Dermatologist will be able to discuss this with you.

CAN ANYONE RECEIVE THIS TREATMENT?

With a few exceptions, most people with skin lesions would be able to have this treatment. Your Podiatrist or Dermatologist will carry out an assessment prior to treatment and be able to advise you on this.

All information read here is based on Patient Information Sheets created by trained, registered Clinicians who are experienced with the product and treatment protocol. Before undergoing treatment ensure your Podiatrist or Dermatologist is registered and has given you the full range of options available.

HOW MICROWAVES WORK

Microwave energy rapidly elevates tissue temperature and creates precise, localised cell destruction.

FIGURE 1.

Infected tissue can exist several millimetres below the surface and can often be difficult to treat using traditional methods, resulting in either untreated tissue or significant damage.

FIGURE 2.

Swift delivers a precise, highly controlled energy dose. As microwaves travel into the tissue, water molecules begin colliding and creating localised heat energy – quickly destroying all infected tissue within a predetermined depth.

FIGURE 3.

In just seconds the treatment is complete and the healing cascade begins immediately. Treated tissue is quickly replaced, repaired and regenerated.
